

JAKUB RADLICKI

Expert Level Designer | Architectural Layout & Procedural World Building

Portfolio: [View Portfolio](#) | Email: architecturedesigns.pl@gmail.com | LinkedIn: [jakub-radlicki](#) | Born: 2002.06.09 | Poland

PROFILE SUMMARY

I'm a Level Designer who actually uses my formal architecture degree to make virtual worlds feel physically grounded and real. I taught myself 3D design and procedural generation because I wanted to build better spaces, faster. I mix a deep understanding of urban design with heavy procedural logic (like Geometry Nodes and UE5) to quickly whitebox spaces that are perfectly scaled. I rely heavily on lighting, material choices, and spatial psychology to naturally guide players where they need to go without holding their hand.

EXPERIENCE

Environment & Layout Designer

INDEPENDENT PROJECTS | 2020 - PRESENT

- Blocked out metric-accurate 3D greybox layouts that actually make sense from a real-world spatial psychology standpoint.
- Put together large-scale architectural demos focused heavily on logical pacing and how players naturally navigate a space.
- Wrote procedural generation logic in UE5 and Geometry Nodes to quickly iterate on huge city layouts.
- Brought massive LiDAR and point cloud datasets into the engine to use as hyper-realistic terrain.
- Used my background in architectural styles, like Gothic and Brutalism, to make sure the urban layouts felt believable.

Contract 3D Artist & Environment Freelancer

J7 (2025.10 - 2026.02) | 3NGAGE (2024.07 - 2024.09) | KNWLY (2022.01 - 2024.07)

- Built automated batch rendering pipelines to speed up material and camera swapping.
- Made optimized 3D structural assets for active game projects, making sure we stayed within tight memory limits.
- Did a lot of quick greybox prototyping and architectural consulting for indie game environments.
- Handled high-end interior design layouts and modeled custom 3D furniture for commercial clients.

EDUCATION

Bachelor of Architecture

WYDZIAŁ ARCHITEKTURY POLITECHNIKI WARSZAWSKIEJ | EXPECTED GRADUATION: SUMMER 2026

- Formal training in structural logic, urban planning, and spatial psychology, directly applied to digital level design and world-building metrics.

TECHNICAL SKILLS

Metric-Accurate Whiteboxing

Unreal Engine 5

Urban Planning & Spatial Flow

Procedural World Building

Player Guidance (Lighting/Color)

LiDAR / Point Cloud Processing

SOFTWARE & TOOLS

3D Modeling, Sculpting & Texturing: Blender, Nomad, Mudbox, Houdini, Autodesk Maya, Quixel Mixer.

Engines & Rendering: Unreal Engine 5 (UE5), Unity, Godot, Vulkan API, OpenGL, V-Ray, Cycles, Eevee.

CAD, Architecture & Parametric: AutoCAD, Vectorworks, Revit, Rhinoceros 3D, Grasshopper, SketchUp, Archicad, Robot, Rmwin, Enscape, D5.

Development, Version Control & Automation: C++, Python, C#, HLSL, GLSL, SPIR-V, JavaScript, Git, GitHub, Docker, n8n, CMake, Visual Studio, VS Code.

Compositing, Video & Motion Graphics: DaVinci Resolve, Blender Compositor.

UI/UX, Web & 2D Design: Spline 3D, Affinity, Figma, Photoshop, Illustrator, Lightroom, CorelDRAW.
