

JAKUB RADLICKI

3D Motion Designer | High-End Rendering & Web Integration

Portfolio: [View Portfolio](#) | Email: architecturedesigns.pl@gmail.com | LinkedIn: [jakub-radlicki](#) | Born: 2002.06.09 | Poland

PROFILE SUMMARY

I'm a self-taught 3D Designer focused on creating super optimized, high-end digital assets for modern tech and finance platforms. I love combining fluid simulations, SDFs, and heavy rendering math to make motion graphics that really stand out while sticking to brand guidelines. I'm obsessed with pipeline speed—I've built rendering setups that cut turnaround times down to under 30 minutes. Lately, I've also been doing a lot of work integrating interactive 3D elements directly into live websites using Spline and JavaScript.

EXPERIENCE

3D Designer & Web Integrator

FREELANCE (2020 - PRESENT) | ARCHITEKCI I DREWNO (2020.01 - PRESENT)

- Put together a fully interactive 3D web experience using Spline and JS, getting dynamic assets running smoothly in the browser.
- Created highly optimized 3D assets and stylized environments that have perfect topology for real-time web rendering.
- Wrote some complex math shaders using GLSL and nodes to drive abstract motion graphics and web backgrounds.
- Set up complete automation pipelines using n8n and LLMs to handle data processing and web scraping for me.

Contract 3D Designer

J7 (2025.10 - 2026.02) | 3NGAGE (2024.07 - 2024.09) | KNWLY (2022.01 - 2024.07)

- Worked with design studios and B2B clients to make high-end product renders and motion graphics that matched their exact branding.
- Built out a logic-driven automation pipeline that lets me crank out hundreds of product renders by dynamically swapping cameras and materials.
- Made custom corporate branding packages, making sure the 2D graphics and 3D work shared the same visual language.
- Designed interior layouts and modeled custom 3D furniture for commercial spaces.

Technical Art Director (Academic Peer Mentorship)

WYDZIAŁ ARCHITEKTURY POLITECHNIKI WARSZAWSKIEJ | 2023 - PRESENT

- Helped out my peers and junior artists at university by teaching them how to standardize their 3D pipelines and fix software bugs to speed up their work.

EDUCATION

Bachelor of Architecture

WYDZIAŁ ARCHITEKTURY POLITECHNIKI WARSZAWSKIEJ | EXPECTED GRADUATION: SUMMER 2026

- Applied rigorous structural geometry and parametric logic to digital 3D design systems.

TECHNICAL SKILLS

Web 3D Integration (Spline/JS)

Premium Motion Graphics

Blender / Houdini

SDFs & Fluid Simulation

Extreme Mesh Optimization

Rapid Iteration Pipelines

Brand Compliance

SKILLS

3D Modeling, Sculpting & Texturing: Blender, Nomad, Mudbox, Houdini, Autodesk Maya, Quixel Mixer.

Engines & Rendering: Unreal Engine 5 (UE5), Unity, Godot, Vulkan API, OpenGL, V-Ray, Cycles, Eevee.

CAD, Architecture & Parametric: AutoCAD, Vectorworks, Revit, Rhinoceros 3D, Grasshopper, SketchUp, Archicad, Robot, Rmwin, Enscape, D5.

Development, Version Control & Automation: C++, Python, C#, HLSL, GLSL, SPIR-V, JavaScript, Git, GitHub, Docker, n8n, CMake, Visual Studio, VS Code.

Compositing, Video & Motion Graphics: DaVinci Resolve, Blender Compositor.

UI/UX, Web & 2D Design: Spline 3D, Affinity, Figma, Photoshop, Illustrator, Lightroom, CorelDRAW.
